

Restart-Workshop of SAMPE Beijing Chapter on
Advanced Composite Materials and Processing Technology 2006

CALL FOR PAPERS

Since several years silence the SAMPE Beijing Chapter will restart in January 2006. The restart event is planned with a technical workshop on 23 May (Tuesday) to 24 (Wednesday), 2006, in good connection with a full program of BIAM's (Beijing Institute of Aeronautical Materials) 50th Anniversary Celebration in Beijing between May 23th – 26th, 2006. The program is attached as an appendix.

The Composite Workshop 2006 will provide an excellent opportunity for showcasing the latest contemporary international research and developments in composite materials and processing technologies.

I am cordially inviting you to participate in the event to share your R & D experiences and knowledge with the Chinese colleagues and international participants. We look forward to receiving your reply. All of advanced composite materials and processing related aspects are invited. I hope you will consider submitting papers.

The reviewed and accepted papers will be published in ***Journal of Materials Engineering***.

Important date:

- Deadline for Submission of Paper Title: January 15, 2006
- Deadline for Submission of Full-length Paper : April 1, 2006

You are welcome to contact me for further information regarding the workshop.

Sincerely yours

Xiao-Su Yi
Prof. Dr.-Ing.
Chairman of SAMPE Beijing Chapter
Director, National Key Laboratory of Advanced Composites (LAC)
2005-11-22

The Beijing Institute of Aeronautical Materials (BIAM) 50th Anniversary Celebrations Program

Beijing, May 23-26, 2006

The Beijing Institute of Aeronautical Materials (BIAM), an organization dedicated to advanced materials development; will celebrate its 50th anniversary with an exciting, thought-provoking **International High-level Forum on Strategic Development of Aeronautical Materials** in conjunction with a joint **Conference of Materials Engineering Committee of Chinese Society of Aviation and Aeronautics (CSAA)** and a parallel **International workshop on Advanced Composite Materials and Processing Technology 2006** which is jointly made with **SAMPE Beijing Chapter (SAMPE Conference of Beijing Chapter)**. All the three conferences will be held between May 23 – 25 2006 in a single conference site in Beijing, PR. China. The three-day, public, interactive events will provide a forum for the research, development and business communities of aeronautic/aerospace industry nationwide and worldwide to explore and discuss the impact and future of advanced materials.

The event will begin Tuesday (2006/05/23) with parallel the annual CSAA Conference 2006 and the SAMPE Conference of Beijing Chapter 2006. Materials and composites experts domestic and abroad will gather at the conferences. A keynote presentation will be given by BIAM's president Mr. GE, Zigan to brief the success story in R & D at the Institute, followed by two separate conferences. The parallel events will continue to Wednesday (2006/05/24) and conclude in the evening with a banquet hosted by Beijing Institute of Aeronautical Materials.

The Thursday (2006/05/25) activity will feature the International High-Level Forum on Strategic Development of Aeronautical Materials. Speakers from world-renowned multinational aeronautical companies, research and development institutes and universities will be invited to present, discuss and envisage the state of the art of technology and future sustainable developments of advanced materials. The event will provide an interactive opportunity for materials community and aeronautics/aerospace industry to explore the latest developments and

accomplishments, to demonstrate the cutting-edge technologies, and to exchange and share respective information and experiences. The participants of the CSAA Conference and the International SAMPE Conference 2006 are invited to attend the International Forum.

As typical and usual for SAMPE Conferences, **an Exhibition** will be made in the conference site to accompany the International SAMPE workshop 2006. The exhibition is open for all participants of the three conferences. In addition, lab tours at BIAM are planned for participants interested. Industry representatives are additionally invited to attend special business sessions where the Institute will provide briefings on its commercial research, development and production.

The BIAM'S 50th Anniversary Celebration will be opened on Friday (2006/05/26). All the guests of International High-Level Forum, CSAA Conference, and International SAMPE workshop are kindly invited to participate in the ceremony.

Please join us as we honor our history, explore the present, and envision the future of aeronautical materials!

Program

BIAM's 50th Anniversary Celebration - General Programs

Date	Morning (9:00~12:00)	Afternoon (13:00~18:00)	Evening
May 23 (Tuwsdy)	2006 Conference of Materials Engineering Committee of CSAA International Workshop on Advanced Composite Materials and Processing Technology 2006 SAMPE Exhibition		
	Opening Ceremony, 30min 1. 2006 Conference of Materials Engineering Committee of CSAA 2. International Workshop on Advanced Composite Materials and Processing Technology 2006 3. SAMPE Exhibition	1. 2006 Conference of Materials Engineering Committee of CSAA 2. International Workshop on Advanced Composite Materials and Processing Technology 2006 3. SAMPE Exhibition	
May 24 (Wednesday)	1. 2006 Conference of Materials Engineering Committee of CSAA 2. International Workshop on Advanced Composite Materials and Processing Technology 2006 3. SAMPE Exhibition	1、2006 Conference of Materials Engineering Committee of CSAA 2、International Workshop on Advanced Composite Materials and Processing Technology 2006 3、SAMPE Exhibition	Conference Banquet
May 25 (Thursday)	International High-level Forum on Strategic Development of Aeronautical Materials		Social Program
May 26 (Friday)	Anniversary Celebration Ceremony / Banquet / Cultural Program
